Professional Summary

Web Developer with hands-on experience building web applications using PHP and Laravel, gained through academic projects and a professional internship. Comfortable working across the MVC stack, from Eloquent-based database design to Blade-driven frontends, with practical exposure to RESTful APIs, MySQL, and Git-based collaboration. Quick to learn, detail-oriented in debugging and testing, and looking to grow as a backend/full-stack developer on a professional team.

Technical Skills

Languages: PHP, HTML5, CSS3, JavaScript

Backend & Laravel

- Laravel MVC Architecture, Eloquent ORM & Database Relationships
- Blade Templating, Routing & Middleware, Authentication
- RESTful API Development & Integration
- Form Validation & Session Management, CRUD Operations
- Migrations, Seeders & Query Builder, Role-Based Access Control (RBAC)

Frontend

- Bootstrap 5, Responsive Web Design, Blade-based Frontend Development

Database & Tools

- MySQL, phpMyAdmin, Git & GitHub, Composer
- Laravel Artisan, XAMPP, Docker (Basic)
- Postman, Basic Linux Environment

Testing & Deployment

- Functional, CRUD & API Testing & Validation
- Form & Authentication Testing, Database Testing
- Debugging & Error Resolution
- Deployment & Post-Deployment Verification, Environment Configuration
- Basic CI/CD & Version Control Concepts

CMS

- WordPress, Basic CMS Management

Professional Skills

- Team Collaboration
- Problem Solving & Debugging
- Communication & Customer Handling
- Incident Management & Coordination
- Technical Documentation & Reporting
- Time Management & Adaptability
- Microsoft Office Suite
- Social Media Marketing

Experience

Pioneer Associate Pvt. Ltd.

3 Months

Intern – Web Application Development

- Built and modified web application features using PHP and Laravel, applying MVC architecture in a live codebase.
- Worked with MySQL databases to design schemas and implement CRUD operations.
- Participated in debugging and problem-solving activities to resolve functional issues.
- Collaborated with team members throughout the development lifecycle, from requirements to testing.

Projects

Nepal ServiceHub – Web-Based Project

Laravel, MySQL, Bootstrap 5

- Developed a web-based service marketplace connecting customers with verified local service providers across Nepal, as a major final-year project.
- Built booking and service management functionality using Laravel's MVC architecture, Eloquent ORM, and MySQL for data handling.
- Implemented secure user authentication and role-based access for customers and service providers, with a responsive Bootstrap 5 interface.
- GitHub: github.com/raabim/nepalservicehub

Room Finder – Web-Based Project

PHP

- Developed a web-based room finder platform using core PHP, allowing users to browse, search, and filter room listings.
- Implemented a MySQL-backed database to store listing details, including CRUD operations for adding, updating, and removing listings.
- Built a simple, responsive front-end using HTML, CSS, and Bootstrap to display listings and search results.
- GitHub: github.com/raabim/ROOM_FINDER

News Portal

Laravel

- Developed a news portal application using Laravel, following MVC architecture to separate routing, business logic, and views.
- Implemented category-based news article management with CRUD functionality using Eloquent ORM and MySQL.
- Used Blade templating to build reusable layouts for the homepage, article listing, and single-article views.
- GitHub: github.com/raabim/new-portal-colorlib

Single Vendor E-commerce Site

Laravel

- Designed and built a single-vendor e-commerce platform using Laravel, covering product listings, cart, and order management.
- Implemented user authentication and basic role-based access control to separate admin and customer functionality.
- Used Eloquent ORM and migrations to model products, categories, and orders, with Blade-based views for the storefront and admin panel.
- GitHub: github.com/raabim/ecommerce.git

Education

Bachelor's in Computer Application (BCA)

2022 – Present

NCIT, Pokhara University

+2 Management (Mathematics & Computer Science)

2020 – 2022

Modern Boarding Secondary School

Certifications

AWS Cloud Practitioner – Certificate of Completion

Oct 3, 2023 – Nov 6, 2023 (4 Weeks)

HQL EduTech

- Completed a 4-week instructor-led training on AWS Cloud fundamentals, covering core cloud computing concepts and the AWS global infrastructure (Regions, Availability Zones).
- Studied core AWS services including EC2 (compute), S3 (storage), RDS (databases), VPC (networking), and IAM (identity and access management).
